Medication and Dosage	Medication Class	Possible EEG Effects	Potential Side Effects	Half-Life
Abatacept (Orencia)	Selective Immunosuppressant	Increase delta, Increase theta	Headaches, nausea, sore throat, upset stomach	13-14 days
Aripiprazole (Abilify)	Atypical Antipsychotic	Increase delta, Increase theta, Decrease alpha, Decrease alpha peak	Headache, anxiety, restlessness, dizziness, upset stomach, weight gain, joint pain, trouble swallowing, insomnia, depression, repetitive movements, tics, seizures, irritability, nervousness	75 hours
Amphetamine and Dextroamphetamine (Adderall)	Analeptic/Stimulant	Decrease theta, Increase beta	Heart palpitations, increased blood pressure, restlessness, irritability, depression, tremors, tics, weight loss, emotional lability, agitation, anxiety	10 hours
Amitriptyline (Elavil)	Tricyclic Anti-Depressant	Increase delta, Increase theta, Decrease alpha, Increase beta	Drowsiness, dry mouth, dizziness, blurred vision, constipation, weight gain, trouble urinating, headache, increased appetite, changed sense of taste	20 hours
Asenapine (Saphris)	Atypical Antipsychotic	No Studies on qEEG Published	Drowsiness, dizziness, numbness, restlessness, constipation, sleep problems, weight gain, drooling, muscle stiffness, agitation, anxiety, tremors, tics, confusion	24 hours
Lorazepam (Ativan)	Benzodiazepine	Decrease alpha	Drowsiness, blurred vision/visual hallucinations, sleep problems, upset stomach, confusion, depression, restlessness, aggression, anxiety, disorientation, panic attacks	12-18 hours
Betaxolol (Betoptic; Kerlone)	Beta Blocker	Alpha peak shifts to theta	Dizziness, drowsiness, fatigue, headache, stomach ache, trouble sleeping, weakness, numbness, abnormal thinking, confusion	5-7 days
Buspirone (Buspar)	Anxiolytic	Decrease alpha peak	Dizziness, headache, anxiety, insomnia, drowsiness, upset stomach, decreased concentration, restlessness, nervousness, unusual excitement, anger, confusion, dream disturbances	2-3 hours
CBD Oil	Supplement	Increase delta, Increase theta, Increase alpha, Decrease beta	Drowsiness, upset stomach, weight change, light-headedness	24-48 hours
Celecoxib (Celebrex)	NSAID; COX-2 Inhibitor	None recorded	Increased thirst, dizziness, drowsiness, headache, trouble breathing, weight gain, upset stomach, back pain, insomnia, scratchy throat, heart burn, rash, confusion, hallucinations	12 hours

Citalopram (Celexa)	SSRI	Decrease delta, Decrease theta, Increase beta	Problems with memory/concentration, headache, increased appetite, sleep problems, dizziness, increased sweating, upset stomach, anxiety, confusion, exacerbation of anxiety, lack of concentration, anorexia, tremors	35 hours
Loratadine (Claritin)	Antihistamine	Increase beta, Decrease alpha peak	Headaches, anxiety, skin rash, drowsiness, stomach pain, nervousness, insomnia	8.4 hours
Clomipramine (Anafranil)	Tricyclic Antidepressant	Increase theta	Dizziness, drowsiness, dry mouth, upset stomach, changes in weight, flushing, fatigue, blurred vision, anxiety, restlessness, insomnia, memory problems, poor focus, impotence, confusion, depression, irregular menstrual periods, muscle stiffness, tremors	12-36 hours
Clonidine HCL (Catapres; Kapvay)	Central Alpha Agonist	Decrease beta, Increase alpha, Increase alpha peak	Drowsiness, fatigue, upset stomach, insomnia, dizziness, depression, confusion, tearfulness, sleep disorder, hallucinations, nervousness, agitation	12-16 hours
Methylphenidate (Concerta)	Stimulant	Decrease theta, Increase alpha, Increase low beta	Blurred vision, lightheadedness, dry mouth, nausea, weight loss, trouble sleeping, tics, headache, irritability, anxiety, restlessness, aggression, depression	3.5 hours (adults) 2.5 hours (childre n)
Rosuvastatin (Crestor)	Statin	None recorded	Muscle pain or swelling, drowsiness, trouble urinating, upset stomach, confusion, depression, insomnia, nightmares	19 hours
Desloratadine (Clarinex)	Antihistamine	Increase beta, Decrease alpha peak	Headaches, anxiety, skin rash, drowsiness, stomach pain, nervousness, insomnia	8.4 hours
Duloxetine (Cymbalta)	Antidepressant	Increase delta, Increase theta	Dizziness, vision changes, weakness, skin rash, urinary problems, weight loss, hypersomnia, insomnia, agitation, nervousness, tension, depression	12 hours
Methylphenidate (Daytrana)	Stimulant	Decrease theta, Increase alpha, Increase beta	Skin irritation, headache, loss of appetite, weight loss, insomnia, irritability, anxiety, upset stomach, aggression, mood swings, tics, fast pulse, anxiety, restlessness, depression	3-4 hours
Divalproex Sodium (Depakote)	Anti-Epileptic	Decrease delta, Decrease theta	Dizziness, weight gain, upset stomach, anorexia, abnormality in thinking, nervousness, abnormal dreams, agitation,	14 hours

			anxiety, aggression, confusion, depression, hallucinations	
Dexmethylphenidate (Focalin)	Stimulant	Decrease theta, Increase alpha, Increase beta	Skin irritation, headache, loss of appetite, weight loss, insomnia, irritability, anxiety, upset stomach, aggression, mood swings, tics, fast pulse, anxiety, restlessness, depression	IR: 2.2 hours, ER: 4-7 hours
Fexofenadine (Allegra, Aller-ease)	Antihistamine	Increase delta, Increase theta, Increase beta	Fever, chills, body aches, upset stomach, cramps, drowsiness, headache	14.5 hours
Folic Acid/L-Methylfolate (Deplin)	Prescription Medical Food – Folic Acid	Possibly increase SSRI effects	Insomnia; irritability; headaches; anxiety; rash; body aches; acne, upset stomach	3 hours
Bupropion (Wellbutrin)	Antidepressant	Increase theta, Increase SMR, Increase beta	Dry mouth, insomnia, dizziness, headache, nausea, stomach pain, weight gain or loss, anxiety, hyperventilation, irritability, restlessness, shaking, abnormal dreams	21 hours
Dextroamphetamine (Dexedrine)	Stimulant	Increase low beta, Increase alpha, Increase peak alpha	Dizziness, vision changes, dry mouth, weight loss, trouble sleeping/insomnia, nervousness, abnormal behavior, aggression/hostility, excitation, anxiety, depression, irritability	9-11 hours
Venlafaxine (Effexor)	SNRI	Decrease theta, Increase beta	Drowsiness, dizziness, strange dreams, upset stomach, insomnia, changes in weight, increased blood pressure, seizures, anxiety, depression, agitation	15-20 hours
Amphetamine (Evekeo)	Stimulant	Decrease delta, Increase alpha, Increase low beta	Headache, upset stomach, anxiety, weight loss, agitation, crying, mistrust, false sense of well-being, depression, nervousness, overreact emotionally, rapidly changing moods, detachment from self or body	10-30 hours
Fetzima (Levomilnacipran)	SNRI	Decrease theta, Decrease alpha, Increase beta	Upset stomach, sweating, increased heart rate, heart palpitations, rash, decreased appetite, urinary hesitation, hypermania, seizures, hypnoatremia	12 hours
Fluoxetine (Prozac)	SSRI	Increase theta, Decrease beta	Insomnia, strange dreams, headaches, dizziness, anxiety, upset stomach, loss of appetite, restlessness, nervousness, agitation, disturbance in attention, hypomania, mania	1-3 days (single dose) 4-6 days (long-term use)
Fluvoxamine (Luvox)	SSRI	Increase delta, Increase theta, Decrease alpha, Increase low beta	Drowsiness, headache, upset stomach, weight loss, trouble sleeping, nervousness, abnormal dreams or thinking, agitation	13-15 hours (youth)

				17-25 hours (elderly)
Zisproasidone (Geodon)	Antipsychotic	Increase delta, Increase theta	Anxiety, headache, depressed mood, weight gain, nervousness, inability to sit still, insomnia, agitation	7 hours
Guanfacine (Intuniv; Tenex)	Selective A2A Receptor Agonist	Decrease alpha	Decreased appetite, upset stomach, trouble sleeping, headache, weight gain, irritability, mood swings, depression, drowsiness, confusion, dizziness, anxiety, nightmares	17 hours
Hydrocodone (Vicodin; Norco)	Narcotic	Increase delta, Increase theta	Dizziness, constipation, nausea, vomiting, sleepiness, anxiety, depression	4 hours
Hyoscyamine (Levsin)	Anticholinergic	Decrease alpha, Increase delta, Increase theta	Dry mouth, urinary retention, blurred vision, heart palpitations, loss of taste, headaches, anxiety, drowsiness, fatigue, dizziness, insomnia, skin problems, short-term memory loss, hallucinations,	2-3.5 hours
Hydroxyzine (Vistaril)	Antihistamine	Increase delta, Increase theta, Increase beta	Dizziness, drowsiness, upset stomach, headaches, blurred vision, restless movements, tremors, confusion, seizures	16-34 hours
Sumatriptan (Imitrex)	SULFA	Increase alpha	Pressure or tingling sensation, drowsiness, dizziness, weakness, anxiety	2.5 hours
Ketamine (Ketalar)	NMDA Receptor Agonist	Decrease delta, Increase theta	Dream-like state, confusion, hallucinations, disturbed vision, jerky movements, drowsiness, dizziness, upset stomach, fear, insomnia, abnormal dreams/nightmares, agitation	0.25 hours
Clonazepam (Klonopin)	Benzodiazepine	Increase delta, Increase beta	Confusion, memory problems, depression, drowsiness, seizures, sore throat, dizziness, irritability, lack of appetite, behavior problems, nervousness	19-60 hours
Lamotrigine (Lamictal)	Anticonvulsant	Decrease delta, Decrease theta, Decrease alpha	Blurred vision, dizziness, nausea, fever, chills, body aches, headache, insomnia, depression, anxiety, irritability, disturbance of concentration, abnormal thinking, nervousness	29 hours
Levetiracetam (Keppra)	Anticonvulsant	Decrease delta,	Aggressive outbursts, anxiety, changes in personality, chills, dizziness, delusions, upset stomach, headache, irregular heartbeat, irritability, joint pain, depression, numbness, sweating, disrupted sleep, clumsiness, poor memory	7 hours
Levothyroxine (Synthroid; Levoxyl)	Synthetic Thyroid Hormone	Based on appropriate levels.	Upset stomach, confusion, anxiety, insomnia, headache, weight change, Nervousness, irritability, emotional lability	6-7 days

		Can increase beta Can change peak alpha		
Escitalopram (Lexapro)	SSRI	Decrease delta, Decrease theta	Dizziness, dry mouth, headache, nausea, constipation, vision changes, insomnia, drowsiness, depression, anxiety, agitation, restlessness, abnormal dreams	30 hours
Lithium	Anti norepinephrinergic and serotonergic	Decrease alpha, Increase beta	Nausea, thirst, weakness, fever, urinary problems, Confusion, delirium, hallucinations, restlessness, tics, worsening of organic brain syndromes	24 hours
Lisinopril (Qbrelis; Prinivil; Zestril)	ACE Inhibitor	Reduce delta	Dizziness, cough, headache, high potassium, upset stomach, low blood pressure, chest pain, fatigue, rash, psoriasis, stomach pain, loss of apetite	13 hours
Lurasidone (Latuda)	Atypical antipsychotic	Increase delta, Increase theta, Increase alpha, Reduce beta	Drowsiness, dizziness, upset stomach, weight change, restlessness, agitation, stiffness, blurred visions, drooling, trouble swallowing, depression, seizures, tics, high blood sugar, trouble swallowing	18-40 hours
Meclizine (Verticalm)	Antihistamine	Increase delta, Increase theta, Decrease alpha, Increase SMR	Drowsiness, headache, fatigue, blurred vision, depression	6 hours
Melatonin	Hormone	Increase theta	Daytime drowsiness, depressed mood, irritability, stomach pain, headache, dizziness	1 hour
Methocarbamol (Robaxin)	CNS Depressant Muscle Relaxant	Increase delta, Increase beta	Drowsiness, dizziness, clumsiness, blurred vision, skin rash, upset stomach, slow heart rate, mood changes, trouble sleeping	1-2 hours
Methotrexate (Trexall)	Antimetabolite	Increase delta, Increase theta	Reddening of skin, swollen tongue, upset stomach, low blood count, renal failure, sore throat, alopecia, photosensitivity, fatigue, liver failure	8-15 hours
Midodrine (ProAmatine; Orvaten)	Alpha Receptor Agonist	None recorded	Upset stomach, chills, anxiety, headache, pounding in the ears, sleep disorders, restlessness, excitability, irritability	3-4 hours
Modafinil (Provigil)	Dopamine Reuptake Inhibitor	Increase theta, Decrease theta peak, Decrease alpha, Increase beta	Headache, dizziness, upset stomach, anxiety, insomnia, nervousness, depression, agitation, confusion, emotional lability, abnormal thinking, irritability	15 hours
Morphine (Roxanol; Duramorph)	Narcotic	Increase theta, Increase alpha	Slow heart rate, swelling in joints, upset stomach, drowsiness, dizziness, sweating, unusual sense of well-being, relaxed or	2-4 hours

			calm feeling, weight loss, abnormal thinking, abnormal dreams, depression, fearfulness, agitation, hypervigilance, hallucinations, delirium	
Memantine (Namenda)	NMDA Antagonist	General increase in all bands	Upset stomach, dizziness, weight loss, joint pain, anxiety, confusion, hallucination, depression, aggression, agitation, insomnia, delusion, sleep disorder, abnormal crying	60-80 hours
Naltrexone (Revia, Depade)	Opioid Antagonist	Decrease delta, Increase beta	Nausea, headache, dizziness, nervousness, fatigue, insomnia, vomiting, anxiety, depression, SI	4 hours
Naproxen (Aleve; Naprosyn)	NSAID	None Recorded	Nausea, indigestion, dizziness, weight gain, ringing in ears, headache, stomach pain, confusion	12-17 hours
Norditropin (Somatropin)	Growth Hormone	None Recorded	Joint pain, numbness of limbs, pain or swelling of extremities, pancreatitis, headaches, nausea, vision problems	0.5 hours
Gabapentin (Neurontin)	GABA analog	Increase delta, Increase theta, Decrease alpha peak	Dizziness, vision problems, dry mouth, headache, weight gain, clumsiness, anxiety, aggressive behavior/hostility, depression, crying, concentration problems, hyperactivity, restlessness, suspiciousness, confusion, abnormal thinking, amnesia	5-7 hours
Omeprazole (Prilosec)	Proton Pump Inhibitor	None recorded	Headache, fever, upset stomach, osteoporosis, insomnia	3-5 days
Oxcarbazepine (Trileptal; Oxtellar XR)	Anti-Convulsant	Increase delta, Increase theta	Upset stomach, rapid eye movement, change in weight, tremors, slowed thoughts, slow/weak movements, rash, change in vision, dizziness, depression, false sense of well-being, crying, sleepiness, agitation, anxiety, apathy, confusion, nervousness	1-5 hours
Oxybutynin (Oxytrol, Ditropan)	Anticholinergic	Decrease alpha, Decrease beta	Dry mouth, blurred vision, dry eyes, stomach pain, heartburn, headache, dizziness, weakness, sleepiness, anxiety, flushing, back pain, rash, hives, UTI	2-3 hours
Paroxetine (Paxil)	SSRI	Increase delta, Increase theta, Decrease alpha, Increase low beta, Decrease theta and alpha peak	Headache, nervousness, anxiety, restlessness, drowsiness, insomnia, upset stomach, weight change, impotence, tinnitus, depression, lack of concentration, abnormal dreams, agitation, depersonalization, drugged feeling, lack of emotion	21 hours
Famotidine (Pepcid)	Antacid and antihistamine		Nausea, dry mouth, dizziness, headache	2.5-3.5 hours

Prazosin	Alpha A1 Blocker	Increase theta, Increase alpha, Increase beta	Dizziness, drowsiness, headache, lack of energy, weakness, heart palpitations, difficulty breathing, depression	3 hours
Desvenlafaxine (Pristiq)	SNRI	Increase delta, Decrease alpha, Increase beta	Headache, upset stomach, insomnia/sleeplessness, anxiety, seizures, abnormal dreams, anxiety, irritability, nervousness	11 hours
Propranolol (Inderal; InnoPran XL)	Beta Blocker	Alpha peak shifts to theta	Fatigue, upset stomach, tightness in the chest, anxiety, hyperventilation, irritability, restlessness, shaking, sleepiness, trouble sleeping, unusual dreams	12 hours
Ranitidine (Zantac, Wal-Zan)	H-2 Receptor Blocker	None Recorded	Constipation, stomach pain, headache, insomnia, decreased sex drive, coughing, skin rash, vision problems, dark urine	2.5 hours
Mirtazapine (Remeron)	Tetracyclic Antidepressant	Decrease alpha, Increase beta	Drowsiness, dizziness, weight gain, upset stomach, abnormal dreams, thinking abnormal, confusion	20-40 hours
Methylphenidate (Ritalin, Quillivant)	Stimulant	Decrease theta, Increase alpha, Increase low beta	Nervousness, anxiety, insomnia, weight loss, dizziness, heart palpitations, tics, irritability, restlessness, agitation	3.5 hours (adults) 2.5 hours (childre n)
Risperidone (Risperdal)	Atypical Antipsychotic	Increase delta, Increase low theta, Increase low beta (sometimes focused in posterior)	Tics, dizziness, sleep trouble/insomnia, headaches, weight gain, anxiety, aggressive behavior, agitation, difficulty concentrating, difficulty speaking, memory problems	3 hours
Quetiapine (Seroquel)	Atypical Antipsychotic	Increase delta, Increase low theta	Dizziness, drowsiness, upset stomach, weight gain, headache, agitation, anxiety, depression, irritability, aggression	6 hours
Sertraline (Zoloft)	SSRI	Increase high beta	Drowsiness, upset stomach, weight gain, insomnia/trouble sleeping, aggravated depression, nervousness, nightmares, mania, suicidal ideation	26 hours

Montelukast (Singulair)	LTRA	None recorded	Skin rash, anxiety, depression, tremors, easy bruising, poor concentration, seizures, agitation/hostility, disorientation, dream abnormalities, hallucination, insomnia, restlessness, suicide thinking	2.7-5.5 hours
Atomoxetine (Strattera)	NRI	Increase beta	Trouble sleeping, cough, upset stomach, irritability, itching, rash, dizziness, insomnia, decreased appetite, nausea, unusual tiredness, aggression, mood swings, depression, abnormal dreams, anxiety	5.2 hours
Levothyroxine (Synthroid)	Synthetic Thyroid Hormone	Based on appropriate levels. Can increase beta Can change peak alpha	Upset stomach, confusion, anxiety, insomnia, headache, weight change, nervousness, irritability, emotional lability	7 days
Topiramate (Topamax)	Anticonvulsant	Increase delta, Increase theta, Decrease alpha, Increase beta	Vision problems, burning sensation, clumsiness, confusion, dizziness, drowsiness, memory problems, anxiety, inattention, speech problems, irritability, depression, weight loss, anxiety, psychomotor disturbance, cognitive difficulty, disorientation, aggression, anger	21 hours
Trazodone (Desyrel; Oleptro)	Antidepressant (SARI)	Increase delta, Increase theta	Nausea, constipation, dry mouth, vision changes, headache, sleepiness, weight changes, anxiety, insomnia, acne, anemia, dizziness, lightheadedness, nervousness, confusion	10-12 hours
Vilazadone (Viibryd)	Serotinergic antidepressant	Increase delta, Increase theta	Upset stomach, insomnia, unusual bleeding, easy bruising, joint pain, agitation, hallucinations, loss of coordination, anxiety, confusion, poor concentration, poor impulse control, seizures, memory problems	25 hours
Vortioxetine (Trintellix)	SSRI	Increase theta, Increase alpha	Upset stomach, dizziness, abnormal dreams, itching, insomnia,	66 hours
Phosphatidylserine-Omega-3 (Vayarin)	Medical Food - Omega 3 Fatty Acid Supplement	Increase SMR	Abdominal pain, dry skin, tics, headaches	2 hours
Lisdexamfetamine (Vyvanse)	Stimulant	Decrease delta, Increase alpha, Increase SMR	Weight loss, upset stomach, anxiety, tics, headache, nausea, insomnia, irritability, agitation, restlessness	47 minutes

Bupropion (Wellbutrin)	Antidepressant	Increase theta, Increase SMR, Increase beta	Dry mouth, insomnia, dizziness, headache, nausea, stomach pain, weight gain or loss, anxiety, hyperventilation, irritability, restlessness, shaking, abnormal dreams	21 hours
Alprazolam (Xanax)	Benzodiazepine	Increase beta	Drowsiness, headache, stomachache, dizziness, cognitive dysfunction, change in speech patterns, irritability, being forgetful, clumsiness, discouragement, drowsiness, feeling sad or empty, irritability, lightheadedness, loss of interest, relaxed and calm, insomnia, anxiety, depression, talkativeness, nervousness	11 hours
Zolpidem (Ambien)	Non-benzodiazepine Hypnotic Type A GABA Receptor Agonist	Decrease theta, Increase beta	Increased sweating, changed saliva production, upset stomach, falling, fatigue, malaise, hypertension, tachycardia, ataxia, confusion, migraines, insomnia, anxiety, hallucinations, abnormal thinking (several more in other body systems)	10-12 hours
Olanzapine (Zyprexa)	Antipsychotic	Increase delta, Increase theta, Increase beta	Upset stomach, dry mouth, headache, sleepiness, weight gain, slow-wave spike complexes, blurred vision, clumsiness, difficulty speaking, restlessness, depression, insomnia, apathy, confusion, euphoria	21-54 hours
Cetirizine (Zyrtec)	Antihistamine	Increase delta, Increase theta, Increase beta	Dizziness, drowsiness, fatigue, upset stomach, tinnitus, insomnia	6.5-10 hours
